Safety Bulletin # 05-08
February 12, 2008

TO: CAWP/H2AP Contractors
FROM: Jason M. Koss, CSP, Director of Industry Relations
RE: Mobile Crane Management Course

A crane can be one of the most useful items on the job site – and the most dangerous. When a crane fails there is an impact on safety, production, deadlines, and budgets. Attend this course to learn mobile crane operations with an emphasis on safety, load charts, setup and operating practices.

Constructors Association and Travelers are holding a Mobile Crane Management workshop to address how cranes can be managed both in terms of safety as well as productivity. This course is ideal for operators, supervisors, riggers, and safety personnel who require a thorough knowledge of mobile crane management. Attendees will also have an opportunity to apply the information learned in this course using the Operating Engineer’s crane simulator. The simulator will allow attendees to learn the principals of crane operation in a safe environment.

- DATE/TIME:** March 6, 2008 8:00 AM – 3:00 PM
- LOCATION:** CAWP, 1201 Banksville Road, Pittsburgh, PA 15216
