Bipartisan Infrastructure Bill Appears on Track to Pass the Senate

A roughly \$1 trillion bipartisan infrastructure bill cleared a critical hurdle in the Senate on Saturday, paving the way for final Senate consideration. The vote was 67-27. It is unclear when a final vote would occur.

The legislation includes nearly \$550 billion in new spending above what Congress was already planning to allocate for infrastructure over the next eight years. If passed in the Senate, the bill faces an uncertain future in the House where a number of progressive Democrats are frustrated with the limited scope of the bill.

The bipartisan infrastructure bill represents the best chance to significantly invest in building and maintaining a broad range of physical infrastructure without unnecessarily burdening the construction industry with new taxes and workforce mandates.

Tell President Biden and Congress to Enact the \$1.2 Trillion Bipartisan Infrastructure Bill.

AGC Needs Your Help to Measure the Scope of Construction Labor Shortages by Taking a Quick Survey

The survey will close on August 16th.

The construction industry has experienced some very significant and sudden changes during the past few months that have led to dramatic changes in demand for work and the need for new workers. We need to understand exactly how those changes are impacting the industry's current workforce needs to better be able to advocate for measures to help the industry's labor needs in both the short- and long-term.

That is why we are asking you to take a few minutes to complete the following workforce [survey](#) that we and our partners at Autodesk have prepared. The more people understand the scope, and consequences, of current labor market conditions, the more likely they are to enact measures to help meet the industry's needs. The more members who take the [survey](#), the better able we all will be to describe labor market conditions where you operate.

Please consider taking a few moments to complete this important survey. The purpose of these surveys is to educate legislators and others about the scope, and consequences, of current labor market conditions, in hopes that they will then enact measures to help meet the industry's needs. **They are very close to having enough survey responses from Pennsylvania to be able to create state-specific fact sheets for our state, so your participation will have a big impact.**
