INTRODUCTION TO TEMPORARY TRAFFIC CONTROL SAFETY

PennDOT has established a Temporary Traffic Control Safety Training Program (TTCSTP) to improve safety of both workers and the traveling public while improving consistency across Pennsylvania's work zones.

This 90-minute course is online and is titled the: *Introduction to Temporary Traffic Control Safety*. At the end, there is a 20-point quiz with a certificate if participants score 70% or better (to save, must print or screenshot at completion).

The course is designed for personnel involved with the installation, modification, and removal of temporary traffic control devices as well as work zone supervisors and managers. The course provides the fundamental skills and knowledge to safely perform their job in any work zone.

Objectives:

- Recognize the importance of TTC for safety of crew and the traveling public.
- Review TTC safety principles and the fundamentals of TTC from PennDOT Pub 213 and the Manual on Uniform Traffic Control Devices (MUTCD).
- Examine worker safety considerations.
- Review common TTC procedures.

Agenda:

The course has 6-modules on the following: Introduction, Safety Attire, Traffic Control, TTC Duration and Requirements, Worker Safety Awareness, and Building TTC Skills.

Register:

Click [here](#) to access the course; you may also find the course in the CAWP member portal under Online Training. (click [here](#) for instructions on how to access the portal)

Cost:

No cost
